FREE GOLD IS FOUND

The Yellow Metal In Native State In the Sacramento.

NOT SPECIALLY IMPORTANT

BUT STILL IT APPEALS TO EVERY MINING MAN.

The Daisy Mill-Work Progressing Finely In the Erection of Reduction Works-Pleased With the Hercules - Development Work Progressing On This Lion Hill Property - Raid On Northern Bulls and Bears Indulge in a Scrap-Light-Bulls and Bears Indulge In a Scrapping Match On the Exchange-The La Sal Mountains-The Herald's Correspondent Visits the Camp of El Monte-Ontario Mill Tailings-Marsac Mill to Be Started Up On An Experimental Run-Northern Light Cyanides-The Martha Washington Shipment

port was confirmed, although no details were obtainable. In fact, no great stress was attached to the discovery, as the existence of good values in oxidized ore is good enough for the company, as oxidized ore leaches better by the cyanide process than free gold, unless the gold in a free state is exceedingly fine, and there is a growing belief among Mercur miners that this is the condition of Mercur ore, the free gold being so fine that its presence is not discernable, even with the aid of a powerful glass.

not discernable, even with the aid of a powerful glass.

This is not the first instance of the finding of free gold in the mines of Mercur. Two years ago a piece of quartz with free gold sticking to it was found in the Mercur ore bin, although it was never ascertained from which portion of the mine it came from, while free gold has also been picked up in the Geyser-Marion mine, which would indicate that there is a belt or zone running through the camp which carries the unalloyed metal mixed with the oxidized ores.

The officers of the company The officers of the company were very reticent regarding the finding of free gold in the Sacramento, not wishing to arouse any undue excitement over the incident, which, of itself, cuts no important figure, as the gold in the ore is just as valuable unseen as when seen; still, there is something in the appearance of gold in a native state that appeals to every mining man, and the fact that it is occasionally found in the fact that it is occasionally found in the mines of Mercur creates renewed interest in this camp of such wonderful possibilities. In speaking of the Sacramento yester-

In speaking of the Sacramento yester-day a well informed mining operator, who has visited the property of late, stated that the indications were that within the environments of this prop-erty there would yet be found the larg-est body of ore ever exposed in the world, with the possible exception of the veins in the Homestake and Tread-well mines. This, however, will take some time to demonstrate satisfactor-ity. Still, the showing in this mine is magnificent, and the ore bodies so far magnificent, and the ore bodies so far disclosed seem exhaustless in their ex-

THE DAISY MILL.

Work Progressing Finely In the Erection of Reduction Works.

A. H. Mayne, the manager of the Daisy, on the west dip in Camp Floyd district, was in the city yesterday, and when seen by a representative of the Herald he was feeling in excellent spir-its over the splendid condition of the mine and the progress that is being made in the erection of the mill, which, it is believed, will be grinding away on it is believed, will be grinding away on good ore within the next 60 or 90 days. In speaking of the progress made in the construction of the plant, Mr. Mayne stated that the foundations were completed, while the timbers for its building were nearly ready to put together, besides which the first carload of new machinery is expected to arrive the first of the week, to be followed immediately by the balance of the equipment for the works, which will embrace eight solution tanks of a capacity of 28 tons of ore each, which, it is expected, will give the mill a daily capacity of 106 tons.

Pending the completion of the mill, according to Mr. Mayne, small tubs are d ore within the next 60 or 90 days

membrace eight solution was each, which of the completion of the server of the precision of the completion of the completion of the company is conserved and the short of the completion of the company is conserved and the short of the company is conserved and the short of the company is conserved that already there are blacked out in the conser

in time take rank with other mines in that locality as a producer of the precious metals in paying quantities, and it is more than likely that as a result of his visit, operations in the opening of this property will begin at an early day.

RAID ON NORTHERN LIGHT.

ping Match On the Exchange.

The pit of the stock exchange was the scene of a lively and spirited encounter yesterday between the bulls and the bears, and for several moments pandemonium reigned, the bone of the greatest contention being Northern Light, which was hammered and banged around urtil the friends of this recountry hardly know where they surity hardly knew "where they

The La Clarale, on the same zone, is now down 600 feet with its incline short, and the showing of ore at this short, and the showing of ore at the short of the control of the control of the same zone, is now down 600 feet with its incline short of the control o

one and that it will go to the deep.

Mr. Dern also visited the Chloride Point, with which he was highly pleased as well as astonished at the large amount of ore blocked out and in sight, while he was favorably impressed with the new mill and its arrangement.

One object of Mr. Dern's visit to the Little Pittsburg ground, and as one of the officers of the company he looked over the property with the view of an early resumption of world in its development.

This was Mr. Dern's first visit to the Little Pittsburg, and he thinks more of it now than ever before and feels confident that with intelligent work; it will in time take rank with other mines in the visible of the chief.

ONTARIO MILL TAILINGS. Marsac Mill to Be Started Up On An

Experimental Run.

Park City, April 28.-Regarding the starting up of the Marsac mill on Ontario tailings, Superintendent Chambers stated this morning that a test oers stated this morning that a test run will be made on 2,000 to 3,000 tons of tailings, which will be taken from different parts of the dump to get an average sample. The result of this second experiment will determine whether or not the entire dump will be put through. The tailings will average about nine ounces of silver per ton.
Mr. Chambers inspected the mill this
morning to determine what improvements are necessary. The principal repairs will be made on the roasting furnace and work will be commenced im-

The Ontario's head men. The Ontario's head men, who have served the company faithfully for years, are dropping out of the Park one by one, to find positions in other camps. Now goes Mr. A. D. Moffat, long on the scrylee of the company and during the past 12 years foreman of the Ontario mill. Mr. Moffat has been selected by the Bi-Metallic company to take charge of its 190 stamp chleridizing and amalgamating mill at Phillipsburg, Mont. His selection is a chloridizing and amalgamating mill at Phillipsburg, Mont. His selection is a very gratifying recognition and endorsement of the record he has made in the management of the nilli here. He came to the Park 23 years ago, when the camp was new and the Ontario mine was just being opened up. Becoming almost immediately an employee of the company, he was appointed night foreman of the Ontario mill in 1882, was foreman of the Marsac for six months in 1886 and on July 15, of the same year, was made foreis, of the same year, was made fore-man of the Ontario mill, holding the position until the close down.

Mr. Moffat departed today for Salt Lake for a brief visit with his family and will depart for Mentana in a few

To Be Committed to Memory By All Henry Wonn returned this morning from Stateline.

Northern Light Cyanides.

Word comes from a reliable source that in all probability, by the first of next week, the Northern Light will make a good sized shipment of high grade cyanides, to be followed regu-larly hereafter by consignments larger in size and greater in value.

It is now more than three weeks since the Northern Light mill was started up after its long close down on account of the freezing of the pipe line, and since resuming operations again it has been treating in the neighborhood of 45 to 50 tons daily of high grade ore-ore that will run in the neighborhood of 33 ounces silver and \$3.80 in gold to the ton, and the saving has been so satisfactory in both metals that it has satisfactory in both metals that it mas been estimated that a daily recovery would foot up to about '350, which, if correct, would make the forthcoming shipment of some moment, and as this record will doubtless be maintained as well as improved upon, the insiders feel that they can well afford to hang on to their stock, and there are those who to their stock, and there are those who are somewhat posted as to the affairs of the company who believe that in the near future Northern Light shares will go considerably higher than the figure at which Gill S. Peyton now holds an option on the control of the stock, which is at 60 cents.

Mr. Peyton is now at the mine with one of the officers of the company and it is understood that he will have much to say as to its future operations.

to say as to its future operations, The Martha Washington Shipment.

The Martha Washington was in the market yesterday with a shipment of ore which was sold on controls showing metallic values as follows: First Class-18% ounces silver, 10 per ent lead and \$2 in gold to the ton.

ent lead and \$2 in gold to the ton.
Second Class—110 ounces silver with small amount of lead and gold.
Another shipment is being sorted at in the packet, always at hand ready for mine and others will soon follow. It is learned that the company has awarded the contract for a steam hoist for the mine to the Utah & Montana keep the digestion perfect and save duplicate of the South Swansea hoist.

Are Stuart's Dyspepsia Tablets adapt-

The shipment of ore above mentioned netted the company \$1,055.

Boston and Bontana.
Butte, Mont., April 28.—The stockholders of the Boston & Montana Minholders of the Boston & Montana & Minholders & Mo

ing company met today. The only business transacted was the re-election of the old board of trustees. The trustees meet in New York. The annual report has already been published.

sive developments in its operation will be the order of the day after the first of May.

J. F. Brown and M. J. Botts, county attorney and sheriff of Kane county, were in the city yesterday on business. Mr. Brown is interested in valuable copper properties on the Utah-Arizona border, but at the present he is doing nothing with them. He says, however, that considerable prospecting is going on in the Trumbo and Buckskin mountains.

E. H. Scott, manager of the North Fork placers, on Coffee creek, Trinidad county, California, has arrived at the diggings, after his visit to Salt Lake, and writes that the giants have been at work on a gravel bank for two days, with satisfactory results. The company, composed largely of Salt Lake people, anticipate big returns from this property this summer.

Bulletin, Mountain Home, Nev.: A hig cast iron turbine wheel has arrived here from San Francisco, to be operated on Wiley's placer ground, near Grand View. It was loaded on a team yesterday and forwarded to its destination by the Helfrich Mercantille company, We expect Mr. Wiley's energy and enterprise to create a revolution in placer mining under the Bruneau canal, and predict that 500 men will be profitably employed at placer mining in that vicinity before another winter.

Brig H. Young will leave for Clifton district, Deep Creek, within a day or two, for

in that vicinity before another winter.

Brig H. Young will leave for Clifton district, Deep Creek, within a day or two, for the purpose of making a consignment of ore from the Silver King group, which will carry average values of 35 per cent lead, 250 ounces silver to the ton, and nearly 43 in gold. Of course, it will be expensive to ship from this distance, but Mr. Young and his associates want to show the boys what there is in this country. The Silver King is a great carbonate proposition, and is similar in its characteristics to some of the heavy producers of Leadville.

Manmonth Beach, Well. ir., state auditor. The writ is asked Mammeth Record: What came near being a very serious accident happened at the Aiax mine Sunday morning at 11:20. Gustave Schmidt, while attempting to get out of the way of a biast, fell 30 feet into a chute, striking on his head and shoulders, but fortunately sustained no serious injuries. Dr. Field of Eureka, was called, and, after careful examination, concluded it was not necessary to send the patient to the hospital. Latest reports say that Mr. Schmidt is resting easy, much to the joy of his many friends in this and adsjoining mining camps, where he is very popular. for to prevent the board of equalization from remitting and abating the taxes of insane, idiotic, lufirm or indigent persons to an amount not exceeding \$10 for the current year or in any other

The petitioner avers that the defendants have given notice that on the first Monday in June they will, as a board of equalization acting under section 2579 revised statutes, proceed to remit or abate the taxes of insane, idiotic,

popular.

It begins to look now as if a concentrator would soon be creeted at the Consolidated mine near Brigham City, and it is understood that the contracts for the same are almost as good as let. Some of the Chicago members of the company were out here a few days ago and before returning they took a lot of samples from the mine and said if they assayed over per cent in lead orders would be immediately given for the erection of the concentrator, and as there is any amount of mineral in the mine that will run this much and over it is a safe proposition to say that work in the erection of the plant will begin at an early day, or anate the taxes of misane, motor, infirm or indigent persons.

It is then alleged that the statute under which the board assumes to act is unconstitutional and void in so far as it refers to the remission or abatement of the taxes of the class of persons named, and that the board in acting in the way it purposes, would be

mert of the taxes of the class of persons named, and that the board in acting in the way it purposes, would be exceeding its jurisdiction.

The writ was issued and made returnable for arguments on May 9.

The attorney general on March 19 rendered an opinion at the request of the state auditor, on the question of the power of the board to make the abatements in question. The attorney general held that the statute authorizing it was unconstitutional and that the board had consequently no authority to make the remissions. The members of the board feit that in order to be safe a ruling of the court should be had on the point and with the object of obtaining such the present action is brought. The decision in this case will be applicable to all the county boards of equalization in the state.

Miscellaneous Court Business. of all disease?

Imperfect digestion of food.

Why does imperfect digestion cause disease of other organs?

Because blood nerves, muscles, bone and flesh are derived from the food we cat and digest. If digestion is perfect the blood is pure, nerves and muscles strong, flesh firm. If the digestion is poor, the blood is supplied from half-digested, fermenting food, irritating every nerve and organ. The result is, sooner or later, organic disease, because every organ being poorly nour-lahed the weakest gives way first, and we have liver trouble, kidney com-
